The Pots Company | Our values

Architectural design

We do not work with product designers, we have architects responsible for the design of our pots. This means our pots are conceived in a completely other way. Architectural design means smart, well thought out, sleek and a combination of form and function. Aesthetics is key. Our pots will always have to be stunning in every way possible.

Timeless

We develop ranges which are not bound by trends. We want our products to be pretty and relevant not only today, but also tomorrow and in ten years' time. This has some significant advantages: Consumers will always be able to buy matching pots to the ones they already have, making repeat sales more likely. Because our ranges are timeless, resellers won't be stuck with unsellable stock. What isn't sold this year can still be sold the next without the need for a sale.

Durable

Durability is our main concern. We not only want our products to withstand trends design-wise, we also want them to stand the test of time. Because of this we develop our products with the highest quality and in the case of Ecopots, also with the use of a durable recycled based composite. We want all our pots to be breakproof, frost resistant and UV resistant while still being lightweight and stunning. Basically, we want our products to look good and stay good for at least 10 years.

Innovative

Another result of our architectural design approach is innovation. We want to add new, smart things to the world of pottery like invisible suspension systems, integrated drainage systems and new use of materials.

Carefree

Products from The Pots Company are carefree. With easy unboxing, stacking and practical use. We stand for our products. This means all our products come with a 10 year warranty on breakage and production faults. And when there is an issue, with resellers or consumers, it is our challenge to resolve this quick, smooth and to every ones satisfaction. Carefree in every possible way.

Conceptual (shop) presentations

Buying decisions regarding pottery are often made in the shop itself, so it is key to grasp consumers attention in order to tell and sell your story. This is why The Pots Company puts a lot of effort in creating stunning POS material for our brands to bring forth the strong- points and story of the respective brand.

The **POTS** Company nv

Ecopots, durability by design

Clean, simple lines. A minimalist design where functionality goes hand in hand with beauty. Made from recycled materials with a unique, handmade finish and completely recyclable. Belgian designed Ecopots follows the Scandinavian design philosophy which brings a sense of calm that so many are missing in their daily, stressful life.

When we designed Ecopots more than ten years ago, no one had heard about the 'plastic soup'. No one was thinking about using recycled materials for their flower pots and planters. But we did. We saw the need and potential to use recycled materials for our products and continue to do so today.

Our vision

Both our economies and products are becoming increasingly sustainable. That being said, sustainability is so much more than simply the responsible use of raw materials. We believe in developing products that are sustainable both in terms of durability and style. They should withstand damage and wear and tear, whilst remaining relevant and aesthetically pleasing for their users. After all, to us, the most sustainable products are those you can enjoy year after year, without the need to replace them.

Our brand's mission

Ecopots gives 'sustainability' a different meaning. We design, produce and sell pots made from a recycled based composite and ensure they are sturdy, beautiful and stylish, not only today, but also tomorrow and in 10 years' time.

Recycled based composite

All Ecopots are made from a unique formula containing 80% high quality recycled plastics for a strong structure, 17% recycled natural minerals to improve durability and 3% natural mineral pigments for a timeless colour and UV protection. Supervised by the Belgian Quality Association, all Ecopots are validated for recycled content and we achieve the quality standards defined by PolyCert Europe. Every year, our certifications are evaluated and renewed to guarantee the best quality.

The origin of our recycled materials:

- 15% post-consumer plastics from PET and plastic shopping bags
- 80% post-industrial waste (LDPE 23% ; HDPE 35%; PP 42%)
 - PE from plastic bottles, coatings, packaging foil and plastic tubes
 - PP from diapers and sanitary napkins
- 5% circular waste from production defects, reclaimed in our factory

Our goal is to realise a stable and reliable operation which can only be accomplished by working together with accredited companies to ensure the best quality, time and time again. That is why we have started a partnership with PolyCert Europe. PolyCert Europe uses existing certifications for harmonized audits of polymer-based converting industries, helping us verify quality standards and ensure that the products live up to our expectations.

Many times copied, never matched

At Ecopots, we only want to produce pots of superior quality. This is why we have teamed up with Centexbel, a university plastics laboratory, for the development of truly durable plastics and we ask Bureau Veritas to test our products.

- FFU (freeze test, colourfastness test and leakage test)
- Polycyclic Aromatic Hydrocarbons (PAHs) Content
- Candidate List of Substances of Very High Concern for authorization published by European Chemicals Agency (ECHA) Regarding Regulation (EC) No. 1907/2006
- REACH
- Social audits (BSCI / SEDEX)
- QA-CER by the Belgian Quality Association (BQA) and PolyCert Europe
- Certification Forest Stewardship Council (FSC)

ECOPOTS

Unique handmade finish

All Ecopots have a unique, handmade finish, making each pot different. Our compound formula of recycled plastics and natural minerals makes the pot not only strong and durable, but also very light. Ecopots are UV resistant, break-proof and resistant to temperature fluctuations, ideal for both indoor and outdoor use. They have a unique natural look and feel, making Ecopots the go-to brand for everybody looking to combine timeless design and durability.

Timeless shapes and colours

At Ecopots, we develop products which are not bound by trends. That is why we follow the Scandinavian design philosophy. In short, this philosophy is about creating a calm and clutter free home as a counter balance to our hectic and stressful daily lives. It is characterized by clean and simple lines, minimalism and the use of natural colours and materials.

Key design features

An Ecopots goes through many hands during the production process. All these hands combined represent many years of experience and craftsmanship. At the start of each new design, our design team works closely with the production manager. The designers are responsible for the best looking proportions and functionality, while the production manager is in charge of the strength and quality of the product.

Ecopots and its functionality: now undeniably proven

The three pillars on which the Ecopots brand is built are design, durability and functionality. The latter because plants only thrive when the environment in which they live are optimal. Not only does the plant need good potting soil, regular feeding and watering on time, the right pot is equally important.

At Ecopots we have known this for a long time, and now it has been conclusively proven through technical tests. In mid-2022, The Pots Company, the company behind the Ecopots brand, commissioned the Trial Station for Ornamental Horticulture in Destelbergen (Belgium) to carry out a whole series of tests. This involved comparing a lot of different pots in terms of their performance and their influence on plant quality. The plant included in the test was *Spathiphyllum* or Peace Lily.

Trial Station for
Ornamental Horticulture
Destelbergen (Belgium)

At the end of the trials, plant quality was evaluated by root development and fresh weight. The big winner was Ecopots Venice 2 which led to superb root development, resulting in strong plants with large, full leaves. Helping to achieve these results was the large integrated water reservoir of Venice 2 which continuously supplies the roots with sufficient water. Through natural capillary action, water reaches the upper plant parts on a constant basis. This system continues to function, even in difficult conditions such as high temperature and low humidity. It keeps the plant in top condition for a long time.

By technical testing, Ecopots is committed to improve functionality and continues to build on expertise to develop the most optimal housing for plants. Our products allow plants to flourish and last a long time, similar to what an architect does when designing a house; include water supply, insulation, ventilation... Ecopots combines timeless design with durability and the functionality of its products. Products such as hanging systems, integrated wheels and much more. The brand remains committed to smart innovations to further increase the ease of use.

Shop presentations

Buying decisions regarding pottery are often made in the shop itself, so it is key to grasp consumers attention in order to tell and sell our story. This is why The Ecopots puts a lot of effort in creating stunning POS material for our brands to bring forth the strong- points and story of the respective brand.

- With an extensive and strong shop presentation, impress the consumer and attract him/her to feel the Ecopots story and make the right choice.
- Creating emotion at the shopping moment
- Instore presentation in line with overall branding insights
- Well thought-out implementation: sequence of the colors and selected pot models

Online support

Over the past years, Ecopots has undoubtedly become a very well-known brand in the world of pots, plants and garden. A vibrant brand with a clear signature and a unique look. A brand in which investments are made, in both offline and online support. Creating momentum to further build its reputation. In this way, we stimulate the rotation of sales even more, so that Ecopots will soon adorn every family's living room or terrace.

- The Pots Company Brand Portal access
- Online content for website development
- Store locator on Ecopots website
- Active presence on social media: Facebook, Instagram, Pinterest, TikTok.
- Structured campaigns to reach the right audience
- Ongoing investment to create a community of people with interests in design, sustainability and plants

Ecopots packaging

By simplifying product packaging and labelling, not only is a lot of waste avoided, but brand consistency is also reinforced. This contributes to a stronger premium positioning. A lot of cardboard and plastic will be avoided by rethinking packaging for the logistics process. At the same time, handling is made easier. A new label on the inside of each Ecopots not only brings together important information such as unique selling points and instructions for use, but also protects it during transport and in the in shop. A QR code on the packaging will direct consumers to more information online.

The number of product references will also be carefully considered and reduced. The range will be clearly adapted to the different sales channels: garden centres, online platforms and DIY stores. This simplification, combined with a redefinition of in-store communication, will bring greater clarity to Ecopots shelf presentations. This will help consumers to make the right choice.

Amsterdam Mini

The Ecopots Amsterdam Mini is a small, round flowerpot, suitable for all types of small plants. This mini flowerpot is the charming, miniature version of the Ecopots Amsterdam and is primarily intended for indoor use. Its versatile design makes the Amsterdam Mini suitable for any type of small plant. Whether you love fun succulents, colourful flowers or aromatic herbs, this compact pot provides the perfect home for your small green friends. What's more, the small format also works well on windowsills, desks or as part of a fun plant combo bringing together pots in different formats.

The Ecopots Amsterdam Mini is compatible with the Ecopots Hanging Saucer, giving you even more creative freedom for presenting your plants. Hang up a combination of Amsterdam Minis in different sizes for a floating effect or use the hanging component to add a striking vertical accent to your interior.

Oslo Mini

The Ecopots Oslo Mini is the small version of the Ecopots Oslo, a compact, organically shaped flowerpot primarily intended for indoor use. With its unique shape, this little flowerpot is the perfect addition to any indoor space in need of a natural touch. This mini version of the Oslo series works well with a wide range of small indoor plants. From lively splashes of green to succulents and fresh herbs, any small plant is sure to feel right at home in these natural-looking flowerpots with organically shaped base. Their modest size means you can easily place them on windowsills, tables, shelves or simply in that little corner in need of a touch of greenery.

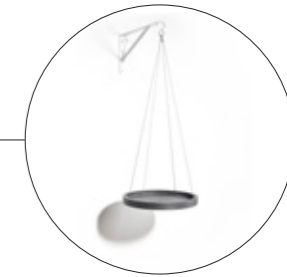

The Ecopots Oslo Mini look great in combination with other small pots. Experiment with different plant species and pot sizes or make them even more special by combining the pots with the Ecopots Hanging Saucer. This is a great way to present an ensemble of floating plant pots in your interior and create a strikingly unique green eye-catcher.

Stockholm Mini

The Ecopots Stockholm Mini is a small, round flowerpot, available with matching saucer. This little flowerpot feels right at home in a small spot in your interior. A bistro table, nightstand or a small, open corner somewhere indoors. These are just a few examples of ideal locations for the Stockholm Mini. Any little spot that could use a dash of green will be getting an instant boost with this pot. Given its small size, this pot is most suitable for small plants. Succulents and cacti are especially popular in combination with the Stockholm Mini. Not only do they bring a hint of natural beauty into your home, they are also easy to care for.

One of the benefits of the Stockholm Mini is that the pot comes available with matching saucer. The combination of the two elements lends the overall ensemble a refined and harmonious look. Besides being visually appealing, this plant saucer is a practical solution that ensures your plants are not given too much water. The surface also offers extra protection.

Stockholm

Ecopots Stockholm is a stylish, round flowerpot that complements your houseplants or patio plants beautifully, whether indoors or outdoors. This pot is particularly popular for houseplants, as it is the perfect height for the standard pots houseplants are typically grown in. The Ecopots Stockholm is bound to be the favourite pot for plant lovers who want to add a dash of green to their living room, bedroom or office. Despite its popularity indoors, the Ecopots Stockholm also looks fantastic out on your patio, balcony or even in the garden.

Whether you opt for a lush green plant or a flowering shrub, Ecopots Stockholm is a solid choice for any type of plant, not matter the setting. The matching plant saucer is both functional – for collecting excess water – and a stylish addition to the pot itself.

Bruges Mini

The Ecopots Bruges Mini is a compact, rectangular flowerpot. The compact size of this planter makes it perfect for adding a dash of green to any small surfaces in your home.

Thanks to its shape, the Bruges Mini allows you to easily arrange several small plants next to each other, helping you can create an original combination of plants in one single pot. So mix things up to your heart's content with small plants such as succulents, herbs or small flowering plants. This little planter is also ideal for adding a touch of green to any small surface, such as narrow windowsills, small balconies or even a modest corner in the bathroom.

Morinda Orchid

The Ecopots Morinda Orchid is a flowerpot designed especially for orchids. It's a must-have if you want to give your orchids the best care while ensuring they remain beautiful on the eye. The most distinctive feature of the Morinda Orchid is its raised base, which is specially designed to boost your orchids' health. The raised section in the middle is an innovation that ensures the plant's roots are never submerged in water. This prevents them from rotting and stimulates healthy growth and flower production.

The flowerpot is also an ideal height to serve as a typical nursery pots for orchids. That means you can easily transplant and look after your orchids without worrying about finding the ideal fit. There are three different sizes available. In each case, the pot offers enough space for the roots to grow and breathe properly, which is essential for the orchid to flower and live for a long time.

Brussels

Ecopots Brussels is a round flowerpot in which a combination of small plants or herbs will feel right at home. The pot is especially eye-catching when placed in the middle of your table or on another raised surface.

This flowerpot is perfect if you want to put several small plants or herbs together in one pot. Mix and match to your heart's content and enjoy a vibrant and varied assortment of plants. The Ecopots Brussels looks most dazzling on a raised surface, such as a table or a shelf. Its round shape and aesthetic appeal make it a striking centrepiece for any room.

The optional saucer creates a harmonious and stylish overall look, while at the same time offering a number of practical benefits. As well as collecting excess water, it protects your underlying surfaces from dirt and stains.

Vienna

The Ecopots Vienna is a round flower bowl that enables you to create the most beautiful plant or flower arrangements, guaranteed to turn heads towards your table centrepiece. The Ecopots Vienna has a generous diameter that allows you to combine a wide variety of small plants, flowers or herbs. Create your own mini garden in a bowl! Its size and low height make this round flower bowl especially eye-catching in the middle of a table, but it will also attract admiring glances on a wide counter top or other high surface.

The Ecopots Vienna comes available with matching round saucer. Besides being a useful way to collect excess water, this acts as an aesthetic complement to the pot itself. This means you can enjoy the double benefit of a stylish design together with a functional purpose.

Tokyo

Ecopots Tokyo is a stylish, oval flowerpot in which you can easily place plants alongside each other. Its shape allows you to place it on either a windowsill or centrally on a side table. Thanks to Ecopots Tokyo's integrated water reservoir, taking care of your plants has never been easier. This smart system ensures a constant flow of water, meaning that your plants will always get exactly what they need. This is a perfect solution for anyone who loves plants, but does not always have the time to care for them. The flowerpot's design is ideal for housing two plants alongside each other, making for a harmonious and attractive display.

What's more, the pot comes available with matching saucer. This protects your surfaces from water and dirt. Combined with the pot, it creates a complete and refined look.

Venice 2

Ecopots Venice 2 is a round flowerpot with integrated water reservoir and innovative design, ensuring your plants never get too much water, giving you healthy plants day in, day out. The integrated water reservoir uses capillary action to water your plant. This means your plant absorbs exactly the amount of water it needs, when it needs it.

One of the most striking features of the Ecopots Venice 2 is the elegant indentation down the side of the pot. Besides being useful for watering your plant, it also shows you the water level at a glance. This means your plant will never get too much water and remain in tiptop condition. The pot is also designed to regulate the your plant's optimum moisture level, never allowing its roots to become submerged. This prevents them from rotting and, again, stimulates healthy growth. The combination of this self-watering system and smart design is the reason that the Venice 2 is an absolute must for anyone wanting to keep their plants healthy.

Dubai

Dubai Ecopots is a set of three stylish flowerpots arranged on one handy saucer. Their varied size means they help create a dynamic and attractive plant arrangement. Thanks to the integrated water reservoir, taking care of your plants has never been easier. Fill the saucer with water and let the Ecopots technology control the watering of your plants. The three independent water reservoirs ensure a continuous supply, allowing each plant to get exactly what it needs. The system is designed in such a way that you only have to add water when there is no more water in the middle of the saucer. Easy, time-saving and your plants stay in top condition.

The Ecopots Dubai set saucer is equipped with hidden rubber wheels. This clever addition does not detract from the design and ensures optimal mobility, allowing you to move your plants effortlessly and without scratching the floor.

Pisa

The Ecopots Pisa is a practical vase for all your cut flowers. With its unique, extra-thick, rounded base, the Pisa vase is both practical and very easy on the eye. The Ecopots Pisa vase has a rounded bottom to ensure no dirt or water is left in the vase after use. This clever design makes it easy to clean and care for the vase, ensuring your flowers are always in a fresh, clean setting.

We have also given the vase an extra-thick base for added stability. This sturdy base prevents the vase from tipping over, even if you use it to house a tall or heavy bouquet. As such, the Pisa is both practical and safe to use. All types of cut flowers fit in the Ecopots Pisa vase. With a choice of three sizes, abundant bouquets and delicate blossoms alike will look wonderful on your table or any indoor area you wish to brighten up. There's a vase to suit your every personal need.

Hanging Brussels

Ecopots Hanging Brussels is a round, hanging flowerpot with an adjustable hanging system. That makes it an ideal way to add floating greenery to your interior. The hanging system is fully integrated into the design, ensuring that the pot retains its stylish appearance. The length can be easily adjusted as you desire, meaning you can always hang the pot at the right height for you. This pot offers complete flexibility, whether you want to create a cosy corner above your dining table or add a dash of green to your living room.

Just like the standard Ecopots Brussels, this hanging version is ideal for combining several small plants or herbs. The integrated water reservoir ensures that the plants always get the right amount of water. This keeps them looking green and healthy. The water reservoir also means you don't need to water the plants as often, which is a definite benefit with hanging plants.

Hanging Saucer

Ecopots Hanging Saucer is a hanging saucer for displaying several small flowerpots. This floating plant holder is ideal if you want to create a vertical green element in your interior. The Ecopots Hanging Saucer has an integrated hanging system that allows you to shorten its height as you wish. That gives you the freedom to hang the saucer at different levels to suit any spot or corner of your favourite room.

This floating plant holder has been manufactured with a focus on stability and durability. It is intended to hold several flowerpots both safely and reliably. The hanging saucer looks gorgeous in combination with the Ecopots Mini series.

Amsterdam

Ecopots Amsterdam is a versatile, round flowerpot that comes in a variety of sizes. Both indoors and in the garden, this pot will help your plants catch the eye. The variety of sizes makes the Ecopots Amsterdam range a big hit. Whether you have small, medium or large-sized plants, there is always a format that will work for you. Thanks to the variety of sizes, it is possible to combine different pots for a luscious green effect in your garden or home.

A handy addition to the Ecopots Amsterdam is the optional saucer, with or without optional wheels. The version with wheels offers tremendous mobility, allowing you to move even the heaviest of plants with ease. This makes maintaining your plants, along with the organisation of your space, much simpler.

Oslo

Ecopots Oslo is an organically designed flowerpot with versatile options, saucer and optional wheels. This flowerpot is an excellent choice for anyone wishing to combine their love of plants with a preference for soft, natural shapes. The rounded base means you get a flowerpot with an organic shape, setting the Ecopots Oslo apart from other round pots. The organic design adds an extra touch of elegance to every plant combination, both indoors and outside on your terrace.

Just like the Amsterdam range, the Ecopots Oslo comes available with a saucer, with or without optional wheels. The mobile saucer with recessed rubber wheels allows you to move even the heaviest of plants with ease. The saucer is designed in such a way that it does not detract from the design, but forms an attractive and harmonious whole with the pot.

Antwerp

The Ecopots Antwerp is a round flowerpot with a narrow base, which makes it particularly suited for displaying houseplants. The Ecopots Antwerp has been designed with a refined aesthetic and a slender base that gives it a subtle, modern look. As well as being an eye-catcher for your interior, this pot provides a sense of light and air to your space. This makes it the ideal pot for your most loved plants. Although it is typically used indoors for houseplants, it is also suitable for outdoor use. By also using this flowerpot on a balcony or patio or in your garden, for example, you can create the same style both indoors and outdoors, bringing harmony to the spaces in and around your home.

The Ecopots Antwerp is also available with a matching plant saucer. Besides collecting excess water, this saucer forms a harmonious entity with the pot itself, thereby completing the design.

Frankfurt

The Ecopots Frankfurt is a stylish, mid-height round flowerpot, suitable for combining small plants or herbs. This flower bowl is sure to look magnificent on your table or another raised surface. The most eye-catching feature of the Ecopots Frankfurt is its mid-height design, making the flowerpot ideal for herbs and other low-growing plants. The bowl has sufficient space for a variety of plants, whilst being compact enough not to overwhelm your outdoor space. Although the Ecopots Frankfurt is typically used outdoors, it can also act as a stylish addition to your interior. You might like to place it on your worktop with a combination of aromatic herbs, meaning they are at a mere arm's length when you start cooking.

The round flowerpot comes available with matching round saucer. It does the job of protecting your surface and collecting excess water, as well as harmonising with the mid-height flowerpot.

Rotterdam

The Ecopots Rotterdam is a square flowerpot that provides a stylish green atmosphere to any space in and around your home, whether indoors or outdoors. The square shape makes it easy to position this pot against a wall or in a corner. This helps you optimise your available space. As such, the Ecopots Rotterdam is particularly suited to smaller balconies, patios or gardens where every square centimetre counts. The flowerpot can also be used in versatile ways for different types of plant. Whether you opt for lush ornamental grasses, a selection of aromatic herbs or a colourful bouquet of flowers, the Ecopots Rotterdam has sufficient space and depth for plants with both deep and superficial roots.

The Ecopots Rotterdam comes available with matching saucer that both collects excess water and provides an aesthetic boost to the pot itself. The combination creates a harmonious overall aesthetic, while also making this flowerpot all the more practical.

Berlin

The Ecopots Berlin is a square, dish-shaped flowerpot that is ideal for displaying low-growing plants and herbs. Its design means that it looks wonderful on your table, worktop or other high surfaces. The dish shape of the Ecopots Berlin holds enough room for several plants, while the limited depth is ideal for plants that do not need space for deeper roots. This makes the square pot ideal for growing herbs, ferns and other low-growing plants. Its compact design means it looks best on high surfaces. As such, it can act as an attractive centrepiece for your table, while also looking great on a stand or kitchen worktop, giving you easy access to your herbs when cooking.

The Ecopots Berlin comes available with matching saucer. This protects the surface from both dirt and scratches, while also collecting the excess water so that your plants never receive too much. The saucer is designed to match the flowerpot, giving the pair an aesthetically pleasing overall appearance.

Bruges

Ecopots Bruges is a spacious, rectangular planter for displaying various combinations of plants on your balcony, windowsill or patio. Ecopots Bruges has a broad design that allows you to seamlessly combine a range of plants. Whether you want to plant a mixture of annuals, a selection of herbs or a group of small, ornamental shrubs, this rectangular flowerpot has enough room for an extensive and varied collection of plants. The planter looks particularly striking on your balcony or windowsill. Its carefully calculated dimensions ensure that it will almost always fit, so that you can enhance any space effortlessly with a dash of green or some colourful blooms.

The Ecopots Bruges comes available with matching saucer. This ensures that everything looks neat and well-kept, while also collecting the excess water so that it doesn't drip from the balcony or windowsill. Using a saucer makes the Ecopots Bruges even more versatile and practical.

Paris

The Ecopots Paris is a large, rectangular planter that is perfect for use on your patio or balcony as a divider, or as a natural way to create some much needed privacy. This large planter is typically used on balconies and patios. Its design makes the Ecopots Paris ideal for dividing a space into different parts in a natural-looking way. This planter is also a perfect way to create privacy or demarcate a little nook. The modern design fits seamlessly into various styles of interior, from sleek and modern to warm and rustic. Its large capacity means that you can certainly opt for exuberant plants such as ornamental grasses or flowering shrubs. These offer a lush and natural look, again contributing to the atmosphere and privacy you want to create on your patio or balcony. It is also possible to use it to combine a variety of plants.

Amsterdam High

The Ecopots Amsterdam High is a tall, round flowerpot with an optional saucer, with or without wheels. This pot adds vertical flair to both your indoor and outdoor spaces. This flowerpot's tall, round shape really helps your plants catch the eye. Whether you go for an elegant palm or lively bamboo and ornamental grasses, they are all sure to look their best in this pot. The slender, vertical shape is also a space-saving solution, allowing you to position a dramatic plant without taking up too much room.

A matching saucer, with or without rubber wheels, comes as an optional extra. In any case, it's a good idea to use a saucer to collect excess water. This also protects your underlying surface from dirt and scratches. What's more, the saucer's invisible, integrated wheels make it easy for you to move the pot around.

Oslo High

Ecopots Oslo High is a tall flowerpot with an organic design. Its additional height allows you to add a touch of green to any forgotten corner. Its tall, elegant structure truly makes the Ecopots Oslo High stand out. Thanks to its space-saving design, the Ecopots Oslo really comes into its own in smaller spaces. Its vertical shape takes up less floorspace, allowing you to enjoy greenery in even the smallest of spaces. This tall flowerpot is also a smart choice for apartments, balconies or compact office spaces.

A handy addition to the Ecopots Oslo High is the optional mobile saucer with wheels. This allows you to move the pot easily, so you can clean or position the plant in the best light.

Stockholm High

Ecopots Stockholm High is a tall, stylish flowerpot with an elegant design. Ideal for those who want to freshen up a green space with a stylish and contemporary element.

This flowerpot stands out for its streamlined, rounded shape. The refined structure gives the pot a modern look, making it ideally suited for accentuating an entrance hall, driveway, etc. Taller plants and ornamental grasses are an excellent choice, as these further emphasise the verticality of the pot.

A handy addition to the Ecopots Stockholm High is the optional mobile saucer. This saucer with wheels improves ease-of-use because it allows you to move the pot seamlessly.

Rotterdam High

The Ecopots Rotterdam High is a tall, square flowerpot whose design makes it a popular choice for accentuating an entrance, hallway or corridor. The square, vertical design gives the Ecopots Rotterdam High a striking appearance that is both timeless and a great way to save space. This pot looks wonderful in places where space is limited, such as narrow corridors or doorways. The format lends your entrance or hallway instant grandeur, both indoors and outdoors. A wide variety of plants work very well in this tall flowerpot, ranging from ornamental grasses to flowering shrubs. The pot's height provides plenty of space for the roots, helping your plants stay healthy.

The flowerpot comes available with matching saucer. This provides a tidy, stable base for your pot, while also helping you avoid over-watering your plants. The saucer is designed to aesthetically complement the pot itself.

Amsterdam Wheels

The Ecopots Amsterdam Wheels is a large, round flowerpot with hidden rubber wheels. This pot combines mobility with a stylish design to display your large plants in the most beautiful indoor and outdoor settings. The high-quality integrated wheels ensure easy movement for even the largest plants. The rubber wheels are safe on even the most delicate of surfaces. This flowerpot acts as a magnificent setting for a wide range of plants. The pot's generous dimensions allow the roots of these large plants sufficient space to grow and bloom.

The Ecopots Amsterdam Wheels also includes wedges to anchor the pot firmly in place. This ensures both stability and safety, particularly beneficial if, for example, the pot is positioned in a windy spot, or simply if you want to keep it from moving.

Rotterdam Wheels

The Ecopots Rotterdam Wheels is a large, square flowerpot with hidden rubber wheels. With its sleek lines, this pot brings out the best in large plants. The invisible rubber wheels under the pot create a sleek, smooth look, allowing you to move the pot around effortlessly, even with very large plants inside. This makes it easy for you to redesign your space or simply move the pot out of the way for cleaning. The generous inner dimensions provide enough space for the roots of these plants, keeping your green favourites healthy and growing.

The integrated water reservoir ensures a continuous and efficient release of water, meaning the plants always receive the right amount of water. This is really useful when looking after particularly large, thirsty plants.

Amsterdam Wall

The Ecopots Amsterdam Wall is a round, hanging flowerpot that allows you to add a dash of green to any wall, whether indoors and outdoors. The Ecopots Amsterdam Wall is equipped with an innovative hanging system. It's easy to install, so you can take the pot down and hang it up again effortlessly. This user-friendly design makes it easy to take care of your plants and change your wall decorations to suit your needs.

In addition, this hanging flowerpot comes fitted with integrated water reservoir. It ensures that your plants never get more water than they need. The reservoir also helps regulate the moisture content of the soil, keeping your plants healthy and easy on the eye. The flowerpot doesn't need much room, making it ideal for adding a touch of green to a small area or creating a green wall without taking up too much space. The round shape adds a gentle, natural aesthetic to any wall in or around your home.

Manhattan Wall

The Ecopots Manhattan Wall is a modular hanging flowerpot for all your vertical garden projects. These flowerpots are ideal if you only have limited outdoor space, perhaps because you live in the city, or because you only have a small balcony and still want to enjoy some green surroundings. The shape and size of the pots are ideal for plants that don't grow tall, hang downwards or spread horizontally. A unique feature of the Ecopots Manhattan Wall is the modular design of the pots, allowing you to combine different sizes and shapes (rectangular and square) to fit any wall in and around your home. This makes it easy to create a personalised vertical garden to suit your specific space and preferred style.

With the user-friendly hanging system, attaching the flowerpots to the wall couldn't be easier. The installation template with ready-to-use patterns is an added bonus. It makes installation of the pots much simpler: just place the sheet of paper against the wall to find out exactly where to drill the holes. The integrated water reservoir supplies water efficiently, allowing your plants to grow and bloom in the most ideal conditions possible and, most importantly, allowing you to enjoy plants that are both healthy and vibrant.

Hanging Bruges

The Ecopots Hanging Bruges is a rectangular hanging planter that allows you to create ornate plant combinations over your balcony or balustrade railings. A striking feature of the Ecopots Hanging Bruges is its smart hanging system. The hanging brackets have adjustable frame for every type of balcony rail, making them almost invisible and ensuring that your pot always hangs both horizontally and straight. This makes it easier to water your plants or flowers, while also ensuring for a more eye-catching display. The thickness of the pot contributes to its optimal temperature regulation, which is essential for keeping your plants alive, especially outdoors. This feature helps protect your plants' roots from extreme temperature fluctuations, as well as the differences between the seasons.

An integrated water reservoir uses capillary action to ensure your plants only absorb the water they need. This keeps all your plants in excellent condition, so you can enjoy lush greens day after day.

Berlin Grow Table

The Ecopots Berlin Grow Table is a stylish way to grow your own herbs. It comes with three low, square flowerpots in the Berlin series that provide the perfect home for all your herbs or small plants. The Berlin Grow Table has a sturdy frame made of high-quality, powder-coated steel. As well as providing a durable and stable base, it gives the table a modern, elegant appearance. The herb-growing table has been designed to sit at an ergonomic height. This height is ideal for both viewing and working, meaning gardening with this table is both more comfortable and accessible, allowing you to really enjoy taking care of your herbs and plants. Whether sitting or standing, the table's height minimises back pain, making it easier to use.

Saucer Wheels

The Ecopots Saucer Wheels is a round plant saucer with five hidden, integrated rubber wheels, making it possible to move your plants about with ease. This saucer is best suited to flowerpots in the Ecopots Amsterdam series. The rubber wheels under the saucer give it a sleek, elegant appearance. They also make it the perfect complement to the Ecopots Amsterdam series, as well as other round flowerpots. Its high quality means you will now be able to move your flowerpots around with ease, all without causing scratches or damaging the underlying surface.

The saucer is fitted with an inbuilt copper ring. This ring is specially designed to prevent mosquitoes from laying their eggs in the stagnant water in the saucer. This helps create a healthier and more pleasant atmosphere around your plants.

Saucer Wheels Oslo

The Ecopots Oslo Saucer Wheels is a round plant saucer with hidden rubber wheels made especially for the Ecopots Oslo series. The design of this saucer is fully aligned with the organic design of the Ecopots Oslo flowerpots. This seamless integration ensures a harmonious, stylish appearance that emphasises the natural elegance of your plants. Fitted with rubber wheels, this round saucer ensures you can move your plants around with ease, all without scratching the underlying surface.

A saucer collects the extra water to prevent you from ever over-watering your plants, allowing you to maintain an optimal moisture balance. An inbuilt copper ring in the base prevents mosquitoes from laying their eggs in stagnant water, contributing to a healthy and pleasant plant environment.

Design Saucer Round

These saucer designs are compatible with the Ecopots Amsterdam series. They align seamlessly with the aesthetic of the Ecopots Amsterdam. The saucer provides increased harmony to your pot, all while adding a subtle touch to your interior or garden design.

In any case, it is always a good idea to use a saucer. Besides protecting the underlying surface from dirt and water, the saucer is there to collect any surplus water. This keeps the surroundings clean, helping you care for your plants properly by maintaining an optimal moisture balance.

Saucer Square

The Ecopots Saucer Square is a square plant saucer that is suitable for the Ecopots Rotterdam and Berlin series, as well as other square flowerpots. This square saucer has been designed with a modern, minimalist aesthetic that is a perfect fit for the clean lines offered by the Ecopots Rotterdam and Berlin flowerpots. The saucer enhances your plant's appearance and adds a touch of style to your interior or outdoor surroundings.

In any case, having a saucer plays a crucial role in protecting surfaces from water damage. By collecting excess water, the Ecopots Saucer Square effectively prevents water and moisture from damaging your floors or table. This means you can always enjoy clean, well-kept surroundings.

Saucer Rectangular

The Ecopots Saucer Rectangular is a rectangular saucer that is designed to match the Ecopots Bruges planters. This rectangular saucer is ideal for use on windowsills or balconies. As well as enhancing your plants or flower arrangements, it acts as a tidy and stylish presence within your outdoor space. Using a saucer protects your surfaces from dirt and possible water damage. It collects excess water, keeping your windowsills or balcony floors both clean and dry.

A saucer also contributes to your plants' overall health. By collecting excess water, it helps to maintain the correct moisture balance. This ensures your plants get the right amount of water, which in turn stimulates healthy growth.

Saucer Oval

The Ecopots Saucer Oval is designed to perfectly complement oval flowerpots. It has an elegant and modern design, making it an ideal match for the unique oval shape of the Tokyo or Sofia flowerpot.

A saucer is also an effective way of collecting excess water. This prevents moisture from damaging your floors or furniture, while also helping you keep your space clean and tidy. If you place a saucer under your planter or pot, you will never end up giving your plants too much water. Any unnecessary water is collected in the saucer, meaning your plants only absorb the water they need, thereby ensuring healthy growth and beautiful flowers.

Plant X®

Plant X is a lightweight but very stable sponge-like substance that makes the perfect soil replacement for all your plants. It's an aminoplast resin, solely composed of organic elements. Its open cell structure provides great water absorption capacity and air permeability, and ensures great air and water management. This leads to improved water and nutrient absorption by seeds and plants, which results in excellent germination and root development.

POS material

The philosophy of Ecopots focuses on durability. Its recycled based composite is strong and lasts long. It's only logical that we extend that long term thinking in the quality of our Point of Sales Materials. While other brands focus on providing cheap throw-away POS material, Ecopots wants to offer a better, long life quality for a reasonable price. This way the POS concepts of Ecopots keep their nice looks and attraction on the shopfloor for a long time which is crucial for the selling out of the products... POS materials pays off!
